

Replace the bracketed fields before sending. Customise the "What I'd bring back" section with one or two specifics tied to your current team or codebase

Subject: Request to attend CodeGenAI Developer Training, 10–11 September

Hi [Manager name],

I'd like to attend the CodeGenAI Developer Training in Amsterdam on 10–11 September 2026, and I'm writing to get approval for the registration cost.

Why this training

AI coding tools — Claude Code, Cursor, Copilot — are changing how engineers ship software, but most teams adopt them without structured guidance. This is a 2-day in-person, hands-on training that takes engineers from prompting fundamentals through to building production-ready agent workflows.

It's run by re:cinq, an official Anthropic Claude partner that has trained 100+ engineers at Odevo and has reference work with teams at Siemens, Adidas, Shell, Inditex, Capgemini, and Zalando.

What I'd bring back

- A structured, evidence-based approach to using Claude Code on our codebase
- Practical experience with the MCP ecosystem — database querying, debugging via Chrome DevTools, Docker-based agent workflows
- Working repos and exercises I can adapt for our team
- Access to a private Slack channel with the trainers and cohort for ongoing technical questions
- A Certificate of Completion to add to my professional development record

The details

- Dates: Thursday 10 & Friday 11 September 2026, 09:00–17:30 both days
- Location: Central Amsterdam (in-person)
- Format: 80% hands-on exercises, 20% taught content. Max 15 engineers per cohort.
- Cost: €[insert ticket price] per person
- Full agenda: re-cinq.com/code-gen-ai

Why now

Tickets are tiered — the rate increases as seats fill. Confirming earlier reduces the cost. I'd appreciate a response by [date] so I can secure my spot before pricing moves.

Happy to walk through the agenda in more detail if useful. Thanks for considering.
